

10 TEEN DRIVING STATS THAT MIGHT SURPRISE YOU

DID YOU KNOW?

On average

6

teens die, and

650+

are injured

every day in the U.S. because of motor vehicle crashes¹.

The risk of motor vehicles crashes is higher among

16 to 19 year olds

than among any other age group.

3x

Their fatal crash rate per mile driven is nearly three times the rate for drivers ages 20 & over².

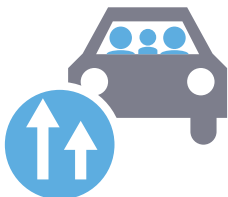

Signing your teen up for an approved driver education program can not only reduce their crash risk, but can potentially save you money! Call ALINK to learn more.

FIND OUT WHY

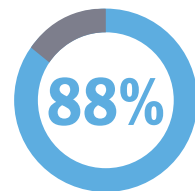

6 out of 10 teen crashes are caused by driver distraction².

The fatal crash risk increases for each teenage passenger in a teen driver's car¹.

1 in 3

teens take their eyes off the road when app notifications come in while driving.

of teens who self-identify as "safe drivers" admit to multi-tasking while driving³.

10 TEEN DRIVING STATS THAT MIGHT SURPRISE YOU

Before your teen hits the road, set clear rules & expectations of their behavior while behind the wheel - such as a no-phone rule & passenger limit. Reviewing **The Parent-Teen Driving Contract** is a great place to start.

Crash risk is particularly high during the first months a teen is licensed.

Teens are more likely than older drivers to speed and follow other vehicles at an unsafe distance.

Compared with other age groups, teens have among the lowest rates of seat belt use¹.

Help your teen develop safe habits by regularly observing their driving and providing constructive feedback. Call ALINK to learn about tracking tools that can also lower your insurance costs.

PARENTS ARE KEY TO SAFER TEEN DRIVING.
